

Fardan Sultan

Full-Stack Web Developer · Creative Coding & Motion

Karachi, Pakistan | fardansultan47@gmail.com | linkedin.com/in/fardan-sultan-56a0ba2a9

PROFILE

Freelance web developer with **5 years of experience** building fast, animated websites and full-stack products. I take projects from design to deployment on my own, and I'm strongest where motion and craft matter: scroll-driven storytelling, WebGL shaders and interfaces that feel smooth on every device.

EXPERIENCE

Freelance Web Developer

2021 – Present · Remote, Karachi

- Design and build marketing sites, web apps and full-stack products for clients, end to end: from Figma layouts through development, launch and iteration.
- Build custom WordPress sites and plugins, and Laravel and Node.js back ends with REST API design and third-party API integrations.
- Specialise in motion-heavy front ends: GSAP and ScrollTrigger timelines, Lenis smooth scrolling, Three.js, WebGL and custom GLSL shaders.
- Ship mobile apps with React Native and Expo, and desktop apps with Electron, on MySQL and SQLite data layers.
- Build for performance and accessibility: responsive layouts, lazy-loaded media, keyboard focus states and reduced-motion support.
- Handle the whole client workflow independently: scoping, communication, delivery and revisions.

SELECTED PROJECTS

01 Wavelength

Agency landing page with a real-time WebGL wave shader and dithered hero.

02 Drag Reel

Developer portfolio built around a draggable project slider and looping video.

03 Redline

Custom car brand site with scroll-driven storytelling and bold typography.

04 Atelier

Creative studio site with selected work, an experiments grid and video previews.

05 Bloom

Scroll-driven image sets with letter-by-letter titles and a custom cursor.

06 Savour

Restaurant and hotel group site with a filterable menu carousel.

07 Stillframe

Photography portfolio with a staged entrance and an image grid.
